

MEETING NOTES – 14th July 2025

Attendance:

Russell Aston and Pat Pennniston

With

Helen Bolton and two colleagues – HLB Runners

At The Rec

Points

Parking – This is a concern. Any additional parking would be appreciated.

Running Track - Whilst an oval running track would be ideal they appreciate this isn't likely given the pitch. So a 100m straight minimum 3 lanes. Grass surface is fine.

RA paced around and this should be fine. Will need to use googlemaps to spec it all out. 100m pitch for adult is getting tight on the basketball area.

Pavilion – This is what they're most keen on as it will allow them to develop more of a social aspect. RA said he'd consult/liase with them further as plans progress. Their needs – cold water, hot/boiling water, fridge. Changing area would be useful as in inclement weather it would be used.

Storage – Similar to MM would appreciate storage (cones and other stuff) but not much.

MUGA and Adult equipment – The runners wouldn't a big user.

Grass guard tiles – This or similar, to provide a sort of hard standing which would be used for warming up/down, locate above/beside the pavilion.
