Speed Watch (Information provided by M Crawford)

Just one roadside session was carried out last month (0800-0900, Clophill Road adjacent to Green End, eastbound).

For the first time in many months, during the course of this session, there were no vehicles logged that exceeded the reportable threshold.

The monitoring point on Clophill Road is only 150m from a fixed SiD, which on this occasion, we consider contributed to this zero report.

The new SiD procured by MPC has been installed on Flitwick Road and is working well. The second, destined for Badger Hill, is scheduled to be installed on Monday 11th. Thanks to all who contributed to making this happen.

Other Safety and Crime Matters

Cllr Browning attended the police priority setting meeting at HQ Kempston on 8th October. The police are clamping down on illegal electric scooters and bikes. Once seized, it will not be possible for the owners to get them back. Other areas of their focus for the next three months will be tackling antisocial behaviours, speeding and shoplifting.
